ASSEMBLY INSTRUCTIONS (RE705)

Tools needed – two 7/16" wrenches

IMPORTANT ASSEMBLY TIP: Do not tighten any nut and bolt combinations completely until all parts are assembled together! Finger tighten plus one turn of a wrench only! This will temporarily hold the lock nut on the bolt while helping alignment of all parts! After all parts are assembled together, all nut & bolt combinations must be completely tightened.

1. Bolt a U-shaped tree hugger (RCL12) onto the bottom side of the top step of each ladder section using the (2) provided 1/4-20 x 2" bolts, locknuts and steel washers. U-shaped tree hugger must point in the same direction as welded on links on vertical posts. **SEE FIGURE 1. Tighten all nut & bolt assemblies. Be sure not to over tighten or crush tubing when tightening!**

NOTE: Top end is always the end with holes drilled in step.

NOTE: Head of bolt should be on top side of step and locknut should be on underside of tree hugger.

2. Using (1) of the provided cam straps (48749), insert the looped end of the short strap through one of the welded links of the Trophy Tree Ladder post. Take the entire cam strap assembly and feed it through the loop and pull tight, forming a knot. The cam strap will now be securely attached to the Trophy Tree Ladder. **SEE FIGURES 2 AND 4. Repeat for each section.**

3. Sections are assembled on the ground in the following order: bottom section (RCL9), middle section (RCL10), middle section (RCL10), top section (RCL11). **SEE FINISHED 20' TROPHY TREE LADDER.** Sections stack together by sliding sections together, inside of each other.

NOTE: On 20' model, a second middle section (RCL10) is inserted between bottom and top sections. **SEE FINISHED 20' TROPHY TREE LADDER.**

Figure 1

Figure 2

WARNING

U-SHAPED TREE HUGGER MUST ALWAYS BE BOLTED ON BOTTOM SIDE OF STEPS.

U-SHAPED TREE HUGGER MUST ALWAYS BE ORIENTATED IN THE SAME DIRECTION AS THE WELDED-ON LINKS ON THE VERTICAL POSTS.

SET-UP AND USE INSTRUCTIONS

1. Stand the ladder up against the selected straight tree on dry, level ground. Take snap hook end of bottom section strap, wrap it around the tree, and attach it securely to the welded on chain link on opposite vertical post. Pull the tail of the cam strap so that the section is snugly secured to the tree. **SEE FIGURE 3.** Be certain (2) two contact points of tree hugger are contacting the tree.

NOTE: Be sure you wrap the strap correctly so there are no twists in the strap and that the cam lever of buckle is facing away from the tree.

2. While properly wearing/using a Full Body Harness with a lineman's/climbing belt, climb the climbing aid only far enough to reach the middle section strap and attach it to the tree. Repeat step 1 for proper attachment.
3. Repeat steps 1 and 2 for strap attachment for each section until all sections are securely attached.
4. Reverse set-up and use instructions to take down climbing aid.
